Fipe System

Rendiamo concreto il desiderio del cliente che si affida a noi

La Fipe System nasce nel 1981. Aldo Rosani insieme con la moglie Agata dà vita ad un ambizioso progetto imprenditoriale che nasce con un obiettivo preciso: REALIZZARE UN PRODOTTO PERSONALIZZATO DI QUALITÀ che soddisfi le necessità di una clientela esigente, che non si accontenta del prodotto standard. Sempre in crescita, l'azienda, nel 2000 si trasferisce nell'attuale sede di Cogliate per dar spazio ad un team più ampio e specializzato.

A partire dal 2017 sono Daniela e Fabio, i figli del fondatore da sempre in azienda, a mettersi alla guida della Fipe System, portando avanti i valori che da sempre la fondano.

Soddisfiamo il cliente con soluzioni customizzate e d'avanguardia, realizzando prodotti originali e innovativi. Forti nella ricerca di tecnologie e con il costante aggiornamento di materiali e prodotti rendiamo concreto il desiderio del cliente che si affida a noi.

I nostri servizi: ascolto del cliente e supporto nelle scelte, rilievo misure, preventivi gratuiti, progettazione e disegni tecnici, fornitura e installazione con personale qualificato, assistenza tecnica post vendita, progetti custom su richiesta, progetti "chiavi in mano" dell'ufficio (pavimenti, controsoffitti, ecc...).

Turning our customers' wishes into reality

Fipe System was established in 1981. Aldo Rosani, along with his wife Agata, gives birth to an ambitious business project born with a clear objective: MAKE A TAILORED QUALITY PRODUCT to meet the needs of demanding customers, who are not satisfied with standard products. As a result of its constant growth, in 2000 the company moved to its present headquarters in Cogliate to accommodate a larger and more qualified team. Today Fipe System is run by Daniela and Fabio, who stepped into their father's position in 2017 to lead the company in line with its core values.

We cater for our customers' needs with customized and pioneering solutions, creating original and innovative products. With a strong focus on technology research, we are constantly upgrading our materials and products to turn our customers' wishes into reality.

Our services: active customer-listening and decision-making support, on-site measurements, free estimates, planning and technical drawings, supply and installation by qualified personnel, customer service, customised projects, "turnkey" office projects (floors, false ceilings, etc ...).

Pareti divisorie in vetro per ufficio: trasparenza, brillantezza e leggerezza sono le caratteristiche distintive della parete vetrata. Il vetro è utilizzato come elemento principale dell'intera struttura e la rende una soluzione ottimale per ambienti di lavoro moderni ed eleganti, personalizzabili in infiniti modi grazie all'ampia gamma di finiture e alla facile integrazione con la parete attrezzata e gli armadi serie 446E.

Punto di forza di questa parete è l'assenza di montanti intermedi tra i vetri: la parete sfrutta infatti la portanza del vetro e la modularità del sistema per creare superfici continue. La versatilità, le caratteristiche tecniche e il gradevole effetto estetico ne fanno la nostra punta di diamante.

Moveable glass partitions for the office: transparency, brightness and lightness are the distinctive features of these glass walls. The glass is used as the main element of the whole structure and makes it an optimal solution for modern, elegant work environments, customizable in infinite ways thanks to a wide range of finishes and easy integration with the storage walls and cabinets of the 446E Series.

The absence of intermediate uprights between the panes is the strength point of this wall, through which it is possible to create continuous surfaces thanks to the glass load-bearing capacity and system modularity. Versatility, technical specifications and attractive appearance make it our flagship product.

Pareti divisorie con scuretto per ufficio: la parete con scuretto è caratterizzata da fughe orizzontali e verticali che le conferiscono grande dinamismo e un aspetto estetico moderno ed elegante. Si adatta perfettamente alla suddivisione di ambienti quali: uffici direzionali, sale congressi, sale riunioni e reception.

La parete divisoria dispone di un'ampia gamma di finiture, sia per le pareti cieche sia per quelle vetrate, e può essere facilmente integrata con il sistema di pareti attrezzate e armadi della serie 470E.

Office partitions with shadow gap: the walls with shadow gap feature horizontal and vertical joints that create a highly dynamic, modern and elegant appearance. They are perfect as room dividers for offices, conference rooms, meeting rooms and reception areas.

Both frameless and glazed partitions come in a wide range of finishes and offer easy integration with the storage walls and cabinet system of the 470E Series.

Pareti divisorie attrezzate per ufficio: la parete attrezzata è composta da moduli componibili ed intercambiabili tra loro che permettono una separazione visiva e acustica dello spazio. Questo prodotto permette di creare in un unico ambiente diverse soluzioni d'arredo indipendenti tra loro.

I moduli possono essere allestiti in diversi modi (ripiani, cassetti, classificatori estraibili, appendiabiti, ante in vetro e molto altro) a seconda delle esigenze e dei gusti. E' possibile creare allestimenti misti con armadi e pareti divisorie (serie 36G e serie 110SC), il tutto con finiture e caratteristiche simili e complementari.

Storage partition walls: the wall system consists of modular and interchangeable partitions that provide visual and acoustic separation of space. With this system you can easily create multiple independent furnishing solutions in the same environment.

The modules can be fitted with shelves, drawers, pull out filing drawers, coat racks, glass doors and much more to arrange many different configurations, depending on the individual needs and tastes. Storage walls can be complemented with cabinets and partitions (36G and 110SC Series) to obtain a variety of adaptable settings, with similar and matching finishes and features.

Pareti divisorie con coprifilo per ufficio: le pareti con coprifilo sono il nostro prodotto più economicamente competitivo; di semplice realizzazione e installazione rapida, vengono utilizzate per la creazione di box o cabine uffici con la peculiarità di modificare gli ambienti lavorativi con estrema velocità e semplicità.

In grado di adattarsi alle diverse caratteristiche degli spazi in cui viene installata, questa parete può anche essere modificata con facilità successivamente all'installazione.

Office partitions with covering: our partitions with covering profile are the most price competitive among our product range. Their simple construction and easy installation allow for a swift and effective redesign of your workplace, making them especially suited for cabin offices or booths.

The partitions can also be modified after installation to adapt to the different characteristics of the workspace.

SERIE

KLIA

La porta su muratura/ cartongesso chiamata SERIE KLIA è un sistema di porte modulari utilizzate negli allestimenti misti di pareti divisorie, pareti in muratura o pareti in cartongesso. Le porte serie Klia sono progettate per una perfetta installazione in ogni tipo di parete, dalla muratura tradizionale al cartongesso, con ogni tipo di spessore, grazie alle imbotti telescopiche in alluminio estruso. Le porte serie Klia possono avere Ante con soluzioni in Legno, Vetro temperato o intelaiato, singole o doppie, cerniere lineari, maniglie e maniglioni con serratura integrata.

KLIA SERIES is a versatile modular system featuring doors designed for both masonry and plasterboard walls, ideal for mixed installation setups of partition, masonry and plasterboard walls. Thanks to their design, Klia Series doors fit perfectly in both traditional masonry and plasterboard walls, regardless of thickness, through the use of adjustable extruded aluminium jambs. Klia Series doors can be fitted with single or double panels made of wood, tempered glass, or framed glass. They come with linear hinges, handles, and handle bars with locks.
